PROFESSIONAL SUMMARY

Data and Business Analytics professional with 4+ years of experience delivering data-driven insights for global marketing and professional services organisations. MSc in Management from the University of York with research focused on leadership and innovation in technology firms. Experienced in building scalable data pipelines and analytics solutions using SQL, Python, Power BI and Alteryx to support strategic decision-making, operational efficiency, and business performance improvement.

CORE COMPETENCIES

Business Performance Analysis • Strategic Decision Support • ROI & Profitability Analysis • Process Optimisation • Stakeholder Engagement • Cross-Functional Collaboration

EXPERIENCE

Power BI Consultant – Graeme Hills Consultancy | United Kingdom | Aug–Nov’25

- Reduced client reporting turnaround time by 60% by optimising Power BI data models and automating reporting workflows using Power Automate, integrating email ingestion, SharePoint storage, and Power BI Dataflows.
- Delivered Power BI dashboards for law firm clients, enabling insights into billing, WIP, matter profitability, and fee earner performance.
- Collaborated with finance, operations, and legal teams to gather requirements and translate them into scalable SQL and Power Query data models using DAX-driven logic.
- Key Project
 - ❖ Legal Financial Data Model: Built a Power BI P&L and legal reporting suite with automated email-to-SharePoint ingestion and refresh pipelines, improving reporting efficiency and data accuracy.

Senior Associate – Annalect | India | 2019–2023

- Reduced manual reporting time by 70% by developing Power BI dashboards and automated ETL pipelines using Alteryx and Python to streamline marketing campaign reporting.
- Improved APAC campaign ROI by 22% through meta-analysis of 14M+ campaign records, delivering performance insights for marketing optimisation.
- Increased data accuracy by 40% and reduced QA time by 60% by designing automated URL taxonomy auditing workflows in Alteryx.

- Maintained data discrepancies below 0.5% by implementing Python-based anomaly detection scripts as part of a scalable data quality assurance framework.
- Managed large-scale data ingestion, ETL, and transformation workflows using Alteryx, Python, and Redshift SQL, ensuring alignment with global metadata standards.
- Supported 50+ stakeholders by delivering 15+ Power BI dashboards enabling campaign performance monitoring and data-driven decision-making.
- Key Project
 - ❖ Automated URL Compliance Audit

Built an Alteryx workflow to scan campaign URLs and flag taxonomy violations, reducing audit turnaround time by 70% and improving data governance.

Web Infrastructure Intern – Media Is You | India | 2019

- Standardised datasets and implemented validation rules to improve reporting accuracy, supporting A/B testing and optimising web content performance.

Technical & Analytics Skills

Data & Analytics Tools: Power BI, DAX, Power Query, SQL, PostgreSQL, SQL Server, Alteryx (Certified), Python (Pandas, NumPy, PySpark), dbt badge

Cloud & Platforms: Azure Synapse Analytics, Azure SQL Database, AWS Redshift

EDUCATION

- MSc in Management (Sustainability Focus) – University of York | UK | 2023–2025
Dissertation: Leadership as a Tool for Innovation in the Technology Industry
 - Analysed how leadership styles influence innovation performance in technology firms
 - Applied organisational behaviour frameworks to evaluate drivers of innovation culture
 - Conducted qualitative and secondary research to identify strategic leadership practices
- B.Tech in Computer Science (Cloud Computing Specialisation) – MRIIS | India | 2015–2019

CERTIFICATIONS

- Alteryx Core Certification (2024)
- Dbt (Data Build Tool) Badged
